SUMMARY

Senior Full-Stack Software Engineer with 5+ years of experience designing, building, and deploying enterprise web applications using C#, ASP.NET Core, .NET 8, Angular, and SQL Server. Experienced in Clean Architecture, CQRS, RESTful APIs, real-time communication with SignalR and Redis, authentication and authorization, payment integrations, and Azure deployment. Additional hands-on experience building modular business applications with Node.js, Express.js, and Vanilla JavaScript. Contribute across architecture, database design, API engineering, frontend development, code review, testing, and deployment.

PROFESSIONAL EXPERIENCE

Senior Full-Stack Developer — BDC (Business Development Company) 10/2025 – Present
Nasr City , Cairo

- Lead enterprise software development using .NET 8, ASP.NET Core, Angular, code reviews, and technical decisions.
- Design scalable applications using Clean Architecture, CQRS, Entity Framework Core, Dapper, and SOLID principles.
- Leverage AI coding agents (OpenAI Codex and Claude) to deliver cross-stack projects, accelerate development, and maintain code quality through testing and reviews.
- Build real-time systems using SignalR and Redis, and implement secure authentication with JWT, OAuth 2.0, and RBAC.
- Integrate payment gateways (Paymob, Apple Pay), Firebase notifications.
- Develop Angular 20/21 dashboards with 25+ modules and automate deployments using GitHub Actions CI/CD.

Full-Stack Developer — Solution Software 05/2021 – 09/2025
10 Or Ramadan City

- Developed enterprise applications for Saudi Arabian municipality clients, including warehouse management, equipment maintenance, and real estate investment systems.
- Designed RESTful APIs with ASP.NET MVC / ASP.NET Core and Entity Framework Code-First, applying layered architecture, Clean Architecture, and SOLID principles.
- Built enterprise workflows with popup, flat, and header-detail interfaces for complex records and operations.
- Integrated Crystal Reports for reporting and business intelligence dashboards.
- Implemented role-based access controls and granular permissions; collaborated in Agile/Scrum teams, code reviews, and technical discussions.

Freelance Full-Stack Developer — Self-Employed 11/2020 – 03/2021

- Delivered web platforms for e-commerce, medicine donation, and food delivery use cases.
- Built Angular interfaces integrated with .NET Core APIs and SQL Server databases.
- Developed responsive experiences and managed staging-to-production deployment.

EDUCATION

Higher Technological Institute, Egypt 09/2016 – 09/2021
Bachelor of Computer Science 10 Ramadan City
General Grade: Good | Graduation Project: Excellent

CERTIFICATES

Frontend Developer Diploma — Route Academy — HTML5, CSS3, JavaScript, TypeScript, Angular, jQuery, Bootstrap, Tailwind CSS, Sass.

Backend Developer Diploma — Route Academy — C#, OOP, Advanced C#, SQL Server, .NET Core.

Full Stack Web Development Diploma — Russian Cultural Center — Frontend and backend development with .NET and ASP.NET MVC.

Backend Course — egy_is — Agile, UML, C#, OOP fundamentals, ASP.NET MVC Code-First.

LANGUAGES

Arabic — Native

English — Intermediate (Professional Working Proficiency).

PROJECTS

Logic Fit SaaS — Gym Management System 05/2026 – Present

Node.js 24, Express 4, Microsoft SQL Server, HTML5, Vanilla JavaScript, CSS, Playwright, Vercel.

- Developed an Arabic-first, responsive Gym Management SaaS using Node.js, Express.js, SQL Server, and Modular Monolith architecture.
- Built membership, subscriptions, QR attendance, payments, financial dashboards, and reporting modules.
- Developed POS and inventory management with SQL transactions, weighted-average costing, and audit trails.
- Secured the platform with RBAC, server-side sessions, HttpOnly cookies, password hashing, and automated backups.
- Implemented Playwright E2E testing, visual QA, and Vercel deployment.

Voltyks — Electric Vehicle Charging Platform (v2.2.0) 05/2025 – 06/2026

.NET 8, Angular 20, Clean Architecture, EF Core 8, Dapper, SignalR, Redis, Microsoft Azure, Paymob, Apple Pay, Firebase.

- Developed and deployed an EV charging platform on Microsoft Azure using .NET 8, Angular 20, and Clean Architecture.
- Designed a six-layer backend with hybrid CQRS, Entity Framework Core, and Dapper.
- Built real-time charging operations using SignalR and Redis backplane.
- Integrated Paymob, Apple Pay, and secure payment processing with HMAC-SHA512 verification.
- Implemented JWT, OAuth 2.0, Twilio OTP, and RBAC for secure authentication and authorization.
- Developed an Angular 20 dashboard with 25+ modules, analytics, PDF reporting, Firebase notifications, and Azure Blob Storage.

S.N.A Al-Attal Engineering Industries | Full Stack Web Application 05/2025 – 06/2025

S.N.A Al-Attal | Full Stack Web Application
Tech Stack: Next.js, TypeScript, Tailwind CSS, Prisma, MySQL, NextAuth.js

- Developed a multilingual, responsive website supporting Arabic, English, and Turkish.
- Built a secure admin dashboard with role-based access control (RBAC).
- Developed RESTful APIs for managing products, clients, news, and catalogues.
- Integrated database management, authentication, Cloudinary uploads,GEO , AEO , and SEO optimization.
- **Website:** https://www.snalattal.me

Adawi Law Platform | Full Stack Web Application 10/2026 – 10/2026

https://adawilaw.com

Adawi Law Platform | Full Stack Web Application
Tech Stack: Laravel 13, PHP, MySQL, Filament 5, Livewire, Blade

- Developed a responsive Arabic RTL legal services website with an integrated admin dashboard.
- Built a CMS to manage services, articles, packages, and client requests.
- Implemented secure authentication, RBAC, and multi-factor authentication (MFA).
- Developed a secure content publishing system with version control, GEO, AEO , SEO optimization, and rollback support.
